### BRAKE CIRCUIT IDENTITY CARD

The Sepang racetrack is one of the longest tracks of the MotoGP and is one of the hardest on motorcycles braking systems.

Several hard cut outs among which the first and last braking are particularly demanding and characterized by sharp decelerations with over 200 km/h (124 mph) difference between initial and final speed.

The numerous cut outs, the high % of time spend braking and the tropical climate make managing temperatures rather critical both for the brakes and for the riders.
