## IMPORTANT

TURN 01*, TURN 06* and TURN 13* are considered the most demanding
for the braking system.

The track is one the MotoGP riders' favourites with points which favour overtaking. The "hops" caused by the undulations of the asphalt, require well balanced, easy to handle motorcycle, which is stable when braked to be able to attack in the faster curves. The track is characterized by two very demanding cut outs (the 1 and 6) characterized by deceleration of 1.5 g and one of the most demanding in the work for the braking systems.
